

Lista de algunos comandos para los que no hace falta meter enable antes:

```
connect
crypto
  eap
  ikev2
  ipsec
  key
enable
ethernet
  loopback
  start
  stop
ips signature update cisco
ping

show
  backup
  bgp
  calendar
  caller
  crypto
  cws
  session
  statistics
  summary
  tower-whitelist
dot1x
ip
  arp
  bgp
  ddns update
  dhcp
  pool
  server
  http
  server
  history
  statistics
  interface
  brief
  masks
  ospf
  redirects
  rip
  database
  neighbors
  route
  ssh | include lgor
  static route
l2protocol-tunnel
location
login
modemcap
ppp
  all
  interface
  gigabitEthernet 0/0
  dialer
pppoe
  relay context all
  summary
rmon
rom-monitor
security configuration interface brief
sessions
snmp
ssh
```

```
terminal | include llowed
udp
usb
  device
  port
  tree
user-group
users
vc-group
