Agregar un host a una zona directa:

```
add-dnsserverresourcerecorda -name "windows10" -ipv4address 192.168.208.45 -zonename "lan.local"
```

Agregar un host a una zona inversa:

```
add-dnsserverresourcerecordptr -zonename "208.168.192.in-addr.arpa" -name 45 -ptrdomainname "windows10"
```
