

Si has terminado de instalar Ubuntu LTS 14.04 Trusty Tahr y has llegado al escritorio sin haber hecho ningún otro cambio, igual te interesa seguir estos pasos:

```
sudo apt-get -y update
sudo apt-get -y upgrade
sudo apt-get -y dist-upgrade

sudo apt-get -y install mc

sudo apt-get -y install vlc
sudo apt-get -y install remmina
sudo apt-get -y install audacity
sudo apt-get -y install filezilla
sudo apt-get -y install thunderbird
sudo apt-get -y install thunderbird-locale-es-es
sudo apt-get -y install virtualbox
sudo apt-get -y install virtualbox-ext-pack
sudo apt-get -y install transmission-gtk

sudo snap install chromium
sudo snap install mysql-workbench-community
sudo snap install discord
sudo snap install telegram-desktop
sudo snap install spotify
sudo snap install code --classic
#sudo snap install docker
```
